Modernizing the Regional Transport Sector

- Transport Assessment
- Vehicle Concepts
- Production Management
- Environmental Impact
- Legal Requirements
- Design Protection

VBD Automotive Technologies Ltd. is the leading regional provider of technology, product innovation, engineering solutions and strategic consulting on Eastern Africa's automotive industries.

Comprehensive Automotive Consulting Services

Combining business, product and process strategy with fundamental technical research and the implementation of large-scale new product development programmes, we are able to take on the greatest challenges in the industry

REALIZING YOUR CONCEPT

With access to a network of advanced and well-equipped technical centers, we are able to serve a wide and balanced customer base supported by the regions vehicle body builders, vehicle assemblers, leading global automakers, vehicle component and system manufacturers, and automotive regulatory agencies.

We are also committed to developing improved integrated active and passive automotive safety systems.

The need to minimize the environmental impact of future vehicles is a major driver for our technology research programmes, one of the principal means by which VBD Automotive Technologies Ltd. intends to maintain its technological edge.

Benefits of this approach are our intention to lead in the development and use of hybrid vehicle systems and renewable energy resources such as biofuel, fuel cell technologies and solar power for the sustainable reduction of CO₂ gases to reduce global warming as well as other harmful emissions.

PROJECT MANAGEMENT

With our commitment to excellence, industry leadership in technology and knowledge, our greatest asset is our people, who are highly qualified multi-disciplined professional engineers, consultants and technicians.

Together, our vision is to make VBD Automotive Technologies Ltd. the natural partner of choice for all our customers in the transport sector.

PRODUCT LIFECYCLE

Automotive consultancy maximizes the value of your product lifecycle by accelerating product launch while minimizing cost, increasing profitable growth through market responsiveness and extending lifecycle returns over time.

- Assess your transport requirements and expected benefits.
- Conceptualize the most viable appropriate vehicle that will reliably meet your needs.
- Manage the production of your vehicle and logistics process to ensure timely delivery.
- Study the overall environmental impact of the project.
- Ensure your vehicle meets all legal requirements and standards.
- Register your unique design concept with KIPI for protection.
