TRANSPORT CONCEPTS

With access to a network of advanced and well-equipped technical centers, we are able to serve a wide and balanced customer base supported by the regions vehicle body builders, leading global automakers, vehicle component and system manufacturers, and automotive regulatory agencies.

We are also committed to developing improved integrated active and passive automotive safety systems.

The need to minimize the environmental impact of future vehicles is a major driver for our technology research programmes, one of the principal means by which VBD Automotive Technologies Ltd. intends to maintain its technological edge.

Prototype Build Management

PRICE LIST

(KSHS)

Automotive Consultancy Service Charges. Automotive Design Concept Study	150,000.00
<i>Develop viable transport solution concepts and logistics programmes for implementation</i>
